PRUHDVI KRISHNA

FULL STACK DEVELOPER

Learning Full stack for 4 years I developed Both frontend and backend sites using Javascript and various libraries. I am comfortable in react.js for building single-page applications,Next.js for building full-stack sites and API development using node.js and MongoDB as databases. I am interested in working as Both a front-end developer and a backend developer (or) Full stack developer. so please allow me to showcase my skills with your company.
